SUMMARY

Data Science enthusiast and Computer Science undergraduate with a strong interest in data analysis, machine learning, and artificial intelligence. Skilled in working with datasets, extracting meaningful insights, and building practical projects using Python and SQL. Passionate about solving real-world problems through data-driven thinking and continuously exploring modern AI tools and techniques.

EDUCATION

Bachelor of Technology in Computer Science & Engineering Expected 2028

Uttar Pradesh, India

Relevant Coursework: Data Structures and Algorithms, Database Management Systems, Statistics for Computing, Machine Learning Basics, Operating Systems, Object-Oriented Programming

PROJECTS

Student Performance Analysis Dashboard 2025

Python, Pandas, Matplotlib, Streamlit

- Built an interactive dashboard to analyze student marks, attendance, and subject-wise performance trends.
- Cleaned and transformed raw datasets using Pandas to generate meaningful summaries and visual reports.
- Designed visual insights to help identify performance gaps and compare academic progress across subjects.

Sales Data Analysis System 2025

Python, SQL, Excel

- Developed a data analysis project to study sales trends, product performance, and monthly revenue patterns.
- Queried structured datasets using SQL and prepared reports to highlight high-performing categories.
- Used charts and summary metrics to present business insights in a simple and understandable format.

Weather Data Visualization App 2024

Python, API Integration, Plotly

- Created a weather-based data application to collect and visualize temperature, humidity, and forecast information.
- Processed live API data and displayed it through graphs for easy trend observation and comparison.
- Focused on presenting real-time data clearly with an intuitive and user-friendly interface.

EXPERIENCE

Data Science Learner & Project Builder 2024 – Present

Data Cleaning, Visualization, Exploratory Analysis

- Worked on self-driven projects involving data preprocessing, exploratory data analysis, and visualization.
- Practiced building data-focused applications to strengthen understanding of datasets, trends, and model-ready workflows.
- Improved analytical thinking through hands-on work with structured and semi-structured data.

TECHNICAL SKILLS

Languages: Python, SQL, C, C++, JavaScript

Data Science & AI: Pandas, NumPy, Matplotlib, Seaborn, Exploratory Data Analysis, Data Visualization, Machine Learning Basics, Prompt Engineering

Database: MySQL, MongoDB

AI Tools & Platforms: Jupyter Notebook, Google Colab, Git, GitHub, VS Code, Linux

ACHIEVEMENTS

- Built multiple academic and self-learning projects focused on data analysis and visualization.
- Practiced solving real-world style problems through structured datasets and insight generation.
- Maintained project work and coding practice consistently to strengthen data science foundations.

CERTIFICATIONS

- Completed self-paced learning in Python for data analysis, SQL fundamentals, and introductory machine learning concepts.
